HAND SAFETY TOOL

We're Not Just Feeding You Another Line

LHR Safety's Redtail Taglines Take the Hazard Out of Hoisted Loads.

Redtail Taglines are specially designed to be a safe alternative to ineffective and hazardous rope. When cranes lift objects they can collide with other objects around it, creating hazardous conditions to personnel on the ground. Redtail Taglines, attached to a load, allow ground personnel to pivot the load as it swings on the crane's hook, giving them greater control.

Eliminate Injuries

Using LHR Redtail Taglines can eliminate potential hand injuries and unnecessary delays created by out of control loads during lifting and moving.

Features

- High Visibility Orange Coated End For Easy Safe Grip and Low Light Applications
- ANSI Standard Rebar Gate Hook Rated to 5000 lbs.
- Quick Attach and Release
- High Visibility Impact Resistant Nylon Casing
- Variety of Lengths Available
- Excellent Control
- No Knots, Tangles or Cut-offs
- No Rope Burns
- No Trip Hazard or Risk of Being Dragged
- Flexible for Easy Line Storage
